

EZ SortCart VS™

VERTICAL MAIL STORAGE SOLUTION

Increase operator efficiency while improving sort quality with the EZ SortCart VS.

- Twelve or fifteen tray models.
- Holds eleven thousand pieces of mail.
- Organize your valuable floor space.
- All welded, stainless steel construction.
- Eliminate costly sorting errors.
- Heavy-duty, double ball bearing casters.

EZ SortCart VS™ is designed to hold any USPS mail tray at the ideal ergonomic angle for operator efficiency. Sorted mail can be easily placed in the appropriate tray from its corresponding sort pocket. Full mail trays can be sleeved in place and extracted from either the front or rear of the cart. Mail tray layout matches the sort pocket configuration of your vertical sorter.

Depending on sorter manufacturer, the top three shelves can hold four or five trays each, with a total cart capacity of twelve to fifteen mail trays. That's 11,700 pieces of mail in only 9 square feet! The bottom shelf allows for additional mail tray or sleeve storage.

Not only is the SortCart VS a shelving system, but as its name implies, a durable mail cart as well. All welded, heavy-duty stainless steel construction means we've built the SortCart VS to give you years of dependable service. Casters take the brunt of the wear and tear on any cart, so we incorporated the finest double ball-bearing casters available. The SortCart will easily move on any floor surface. Caster brakes allow the cart to be placed and locked into any position.

Organize your operation with the **EZ SortCart VS.**
