QuickSeal™ Security Sealing Solution is a proven combination of ingredients formulated to instantly activate glue upon contact. Envelopes, tape, stamps or any item requiring a moistened glue strip can be activated with Quick Seal.

Additionally, Quick Seal keeps sealing systems free of any destructive mineral, algae or bacteria development associated with the regular use of water. Quick Seal can be used in any mailing machine, inserter or tape machine and is conveniently poured into the sealing system reservoir without any mixing or measuring.

The introduction of Quick Seal into your sealing system will save you time and money. It eliminates the expense of recreating documents and communications lost in the mail stream due to unsealed envelopes and the cost of unnecessary maintenance due to poor sealing system performance.

Quick Seal security sealing solution, the original premixed sealing solution.
